31460 SHELDON AVIARY/WILDLIFE STUDY CENTER

56" L. X 27" W. X 74" H. Finished oak hardwood exterior. Top superstructure of steel with black powder-coat epoxy finish. Top removable for access to wiring. Interior steel top and ends finished in white. Ends contain integral supports on (1/2") centers for mounting bird perches in the desired location. Water-tight stainless steel pullout debris trays at bottom are easily removed for cleaning from the front without disturbing interior conditions. Removable mesh bottom. Two (2) cupboard storage compartments for food and other items are in base. Two (2) sliding glass doors, one (1) fitted with a removable screen that has two (2) access openings to prevent inadvertent opening of the unscreened side, and instrument panel cover provided with locks. Bird feeders, a perch tree, and two (2) adjustable bird perches are included. Switches on instrument panel control master circuit breaker switch, lighting, blower, and temperature (temperature ranges from ambient, based on 22 degrees Celsius, up to 38 degrees Celsius +/- 1 degree). Hinged instrument panel cover is transparent Plexiglas with lock. Thirty-two (32) watt fluorescent lamp housed in top. Positive ventilation is insured by an integral blower and (3") diameter duct. Blower to provide four air changes per minute. Contract rating 1,100 watts total heater load. Vents into room and includes specially formulated activated charcoal filter and dust filter, both easily accessible for servicing. Ducting to outside not required. Unit mounted on heavy-duty casters and furnished with a finished tack-board back.
